

YOUR PARTNER IN RESOURCE EFFICIENCY

About us

Energy Conservation is a professional engineering consultancy firm employing specialist engineers and scientists with certifications in Energy Management, Measurement & Verification and NABERS.

We provide services to industrial, commercial, government and strata property clients seeking to save costs through reduction in energy consumption and waste.

Our services

Auditing and assessment of energy and waste

In identifying key areas for improvement in energy consumption and waste within your business, Energy Conservation empowers you with the tools to reduce costs, comply with industry standards and minimise wastage.

We provide:

- Targeted Energy Audits
- Energy Audits to AS/NZS 3598:2014
- NABERS
- EPA funded assessments for business

Project implementation

As experts in our field, Energy Conservation can help you develop the projects to maximise your operational energy efficiency and assist you to implement them with our project management services. Remove the stress and uncertainty from implementing your energy efficiency projects and allow our dedicated team to take care of this for you.

- Project Management
- Technical Support

Government incentives

Energy Conservation is an accredited certificate provider, working with clients to provide the advice and documentation necessary to qualify for programs such as the NSW Energy Savings Scheme (ESS), Victorian Energy Upgrades (VEU) and more. Our government funding assistance covers:

- Creation of ESCs under the ESS in NSW
- Accessing Office of Environment & Heritage funding
- Creation of VEECs under the VEU in VIC
- NSW EPA Funding for Recycling Equipment

Measurement and Verification

Our team, including accredited NABERS assessor and Lead Auditor (CEM and CMVP) are the qualified and experienced professionals you need to ensure your business employs best practice in energy efficiency according to EVO 10000 - 1:2012. This is the International Performance Measurement and Verification Protocol used as the international standard for the measurement and verification of energy efficiency investments, water efficiency initiatives and renewable energy projects.

- Measurement and Verification to EVO 10000 - 1:2012

What people say about us

"Be assured, I was more than impressed with the analysis, presentation and advice, and I have been recommending your service to many contacts. And you can quote me on that!"

Malcolm Stoddart

GM Warehouse and Logistics,
Mobis Parts Australia

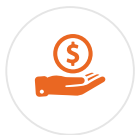

"We tendered for the Measurement and Verification works through OEH. Energy Conservation's tender response was very good and fully captured the scope of works required. Energy Conservation were excellent to work with, answered all questions, visited site frequently and provided me constant updates on how the project was tracking. From day one Energy Conservation instilled confidence and delivered what they promised for this project. I would recommend EC to anyone seeking similar services".

Luke Simkins

Head Building Services, Art Gallery of NSW

ENERGY CONSERVATION - A LEADER IN ITS FIELD - EMPLOYS QUALIFIED ENGINEERING PROFESSIONALS, WHOSE COMMITMENT AND EXPERTISE IN VARIED TECHNOLOGIES CONSISTENTLY EXCEED EXPECTATIONS.

Differentiators

A member of the NSW Office of Environment & Heritage Energy Efficiency Professional Services panel, providing attractive funding opportunities for core services.

An Accredited Certificate Provider (ACP) under the NSW Energy Savings Scheme (ESS), and VEET enabling us to create financial rewards for energy efficiency projects.

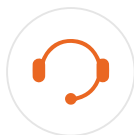

End-to-end solutions including development of business cases, management and delivery of projects and the creation of financial rewards for your business.

Energy Conservation employs the tools, equipment and software required to measure, model and assess a wide range of energy consuming equipment.

Contracted under the NSW Environment Protection Authority Bin-Trim program to provide free waste assessments and grants for recycling equipment.

A product-neutral consultancy service, providing clients with independent, high-quality advice.

A team of certified professional engineers including accredited CEM (Certified Energy Managers) and CMVP (Certified Measurement and Verification Professionals).

Energy Conservation remains 100% independent and brand agnostic ensuring transparent client advice and unbiased solutions.

Energy Conservation is accredited to provide our clients with a financial reward (certificates), in accordance with state and national government programs that help clients offset the cost of implementing energy conservation measures within their organisation.
